

CALL FOR HUMANITY

Dear friend,

My name is Manuel Herranz, born in 1961 in Campillo de Ranas, Guadalajara, Spain. In my youth, as a philosophy student, I put my attention on the possible nuclear annihilation of humanity during the Cold War so that I worked for Peace, trying to convince others about the need for human cooperation and agreement. Later, I continued my studies in Berlin and the soviets offered me their support. It showed me clearly that to be pacifist only on one side just weakens it, and the only possibility for Peace is universality. Since then I have been studying and preparing myself for this moment I dare to address you.

manuel@whiteflag.info; manuelhm@human-unity.org

My proposal is Peace based on Humanity instead of the State. A Peace, then, which is not based on the law but on transparency, truth or, at least, on sincerity.

This seems impossible since our only motivation is to increase our property, this is, to deprive others. However, this is not a condition of our nature.

The cause of our current 'state of war', of secrecy and deception, is weapons existence, objects meant to harm whose purpose must be hidden

Weapons were in nature before humans appeared and humans had to adapt to their existence.

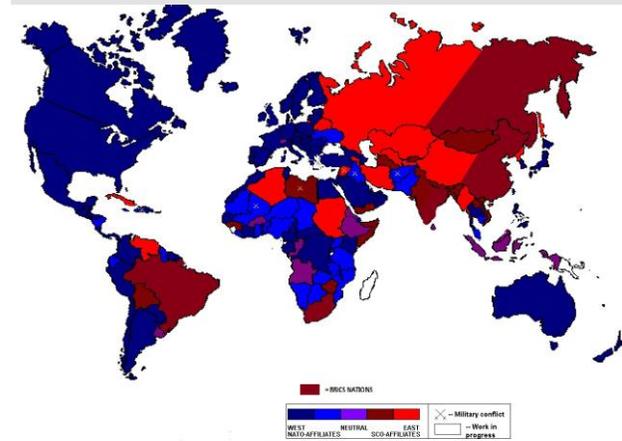

Weapons' existence makes us to hierarchically incorporate in armies, and if not incorporated, domestically they are illegal, and externally they are the enemy

Everything is based on and subordinated to the state or armed unit, and so inhuman justice and public information.

And armies have to ally to face a third party, also an alliance, and they tend to form two blocs, because war always prevails since it is the same arms and war.

Even if the search for a vaccine against Covid-19 is needed for the salvation and benefit of all humans without discrimination, non-cooperation, secrecy on this search prevails so that its property serves only an armed unit, though this increases its costs, time of discovery, production, etc.

Weapons are only against
each other, have no other
cause, are by themselves.

Weapons are top human production anytime and anywhere

Unity is disarmament and so it is a community too because deprivation (private property) cannot exist without the armies and their violence.

The harming purpose of the weapon makes it necessarily, essentially private and everything else is private too since it is subordinate to the weapon/army

Deprivation, private property, is the way for an army to ensure exclusive and maximum exploitation of all resources it controls.

For instance, when the Spaniards arrived in America they belonged to an incorporated army and the aborigines belonged to another and all things were at the service of one army or the other without any possibility between them than war, the invading force dominion or their expulsion. This so simple and clear is, however, veiled by ideologies, such is its confusion power.

While disarmament brings about the use of common sense in employing resources according to all and each common benefit.

Endless accumulation is not and it cannot be human nature

To unite, to make peace, and liberate ourselves from the weapon, we need to disclose weapons identity to everybody simultaneously. This is the Truth

Peace can be promoted only universally, otherwise, the result of it is just damaging its own side. This was Humanity's situation up to the present.

If, we, humans, unite, make inclusive decisions, we will not harm each other, deceive each other, but only benefit all and each other.

United, to harm would be the incongruence of harming oneself. While, on the other side we have the guarantee that disarmament can only be universal because unilateral disarmament only results in servicing –with all strength as ever- another army.

Therefore, I want to call a conference on unity and disarmament, if you want and you can help me, please, contact me.
