

HUMAN UNITY MOVEMENT COOPERATION PROPOSAL FOR VOLUNTEERS

Our objective of human unity arises from our understanding that arms, which are the cause of war, are to destroy the others (not oneself), so if we unite, if we take decisions inclusively, we will end the spirit and intention to destroy ourselves and cooperate only for common good.

The condition for Peace is Universality. It does not make sense to disarm unilaterally, this would be just surrender, to serve another army. And to be fair, impartial, and humane while others are not is unsustainable, detrimental for oneself and our side too. Therefore, war was unavoidable in the past in an unknown world and among unknown people, but nowadays, the difficulty is only that the states or armed units cannot be agents of unity, universality, peace, because the harming purposes of their arms needs the other. To raise the question about people's will of peace universally is enough to achieve peace because peace cannot be refused if questioned universally as harming intentions can only be justified by (the possible bad intention of) the other. And this is what HUM volunteers do, to question the whole world if they want peace.

To bring about peace, unity we propose to hold a public, open, and transparent World Congress of Human Unity/Disarmament in 2025 which will remain as the Congress of Humanity, responsible for human common security, preceded by a Festival of Humanity in Autumn 2024, so that everyone can participate its preparation and organization.

A person declares himself a Friend of Humanity by supporting unity, human peace through:

1. Registration on the website www.human-unity.org at the Sign up page or in the app @HumanUnity.
2. In the case of someone who does not have a mobile phone or computer, she/he can use another person's and the latter can log out of their HUM account and allow that person to declare her/himself a Friend of Humanity by registering/ signing up, and so on as many times as necessary.
3. If a person does not have a mobile phone or a computer or even knows how to write, etc., a Friend of Humanity can register her/him in her profile in the app, entering the box at the top right of the My Personal Profile screen and there add the new member. But direct self-registration has priority, and when dealing with rewards it will be seen if this registration way was needed. In the case of two registrations, only the direct registration will count.

Now, HUM volunteers have two lines of work, both inviting people to register their peace will:

- One, on the ground where there is armed conflict, to achieve a ceasefire there. We started this work in DR Congo and we plan to expand through Africa towards the Middle East until a global ceasefire is achieved before the Festival of Humanity in 2024.

- Another, work on the internet with a global reach, inviting people near or far via social networks to register their peace will, support the ceasefire and donate.

Reward for Friends of Humanity, those who has registered their peace will.

The Congress is established as a permanent center of human unity and cooperation, assuming responsibility for common human security and, therefore, responsible for the issuance of the common human currency to facilitate exchange and promote human development. And those of us who are proposing and convening the Congress do it with the provision that when it is held, the Friends of Humanity will be rewarded for their contribution to peace. Because even if everyone wants peace, we are providing universality and simultaneity that peace needs to be feasible, for peace or unilateral disarmament has no sense.

This reward is set as follows: This year 2023, USD2,24 trillion are spent in weapons which if used (killing and destroying) will multiply Humanity's losses and if, in the best case, not used, is a waste, and when the Congress is held in 2025, it will mean that those resources have been spared for consumption or production, therefore along with the Congress call we propose that:

1. half a trillion be shared among the people in conflict areas who registers their will for peace.
2. half a trillion be shared among the first 100 million people registering their peace will,
3. half a trillion be shared according to the ranking in the Leaderboard of @HumanUnity for their added contribution, well adding people to the app or donating (1 point = one added person or 10 USD donated -but we will be accepting donations only while we can make use of it for spreading the human unity call), and
4. half a trillion for organizing the Congress, including its call and a Humanity's Festival to be held on September 21st, 2024 (more info in human-unity.org).

Please remember that I, Manuel Herranz Martín, am not giving that reward to you, nor anyone else. It is that you and I, and everyone calling for the World Congress of human unity are adding this rewarding condition in its call in a clear and transparent way, because the proof of the justice to be applied from now on is its publicity, this is also universality, so that everyone can freely support it or not.

Signed
Manuel Herranz Martín
Human Unity Movement, President
